DETAILED ACTION

Response to Amendment

This action is in response to the amendment filed on 2/7/2007, wherein the applicant has amended claims 1, 3, 5, 9, 11, 14, 16, 18, 20, 22, 24, 30, 35, 38 and 41.

Election/Restrictions

Newly submitted amended claims 1, 3-14, 16-41 are directed to an invention that is independent or distinct from the invention originally claimed.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, the amended claims 1, 3-14, 16-41 should be withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The inventions are distinct, each from the other because of the following reasons:

Inventions for newly submitted amended claims compared to the previously submitted claims are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

Art Unit: 3714

In the instant case, previously submitted claims are related to a master gaming controller which controls the game played on the gaming machine and to MGC (master gaming controller) configured to load a gaming software from memory and MGC configured to execute player tracking software for performing player tracking. However newly submitted claims has separate utility such as a "first software application", wherein the gaming machine receives inputs to provide features which are other than player tracking services. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sunit Pandya whose telephone number is (571) 272-2823. The examiner can normally be reached on M - F: 8 am - 5:30 pm.
